SysAdmin | AWS Cloud Practitioner

Highly motivated, long-time IT specialist, highly regarded for effectively implementing Linux and Windows-based server systems. I have skills in implementing systems, applications, customer service, ensuring the quality of tasks performed and monitoring their operation. I have over ten years of experience as a systems administrator. Respected as a hard-working, tech-savvy leader and collaborator who supports team members in effectively achieving company goals through a people-focused approach. Exemplary educational qualifications include courses and acquired certificates. An out-of-the-box thinker committed to continuously improving processes, communication and stakeholder engagement to enable growth.

SELECTED HIGHLIGHTS

❖ I collaborated with private companies responsible for production and sales as well as budgetary ones such as state schools, municipal and city offices to improve and implement new IT solutions that improved the end-user experience thanks to the implemented improvements.

❖ Implemented web applications on the local network and in the **AWS cloud**. I installed systems to facilitate remote access for employees.

❖ Monitored the operation of systems and performed backups, reduced deviations and proposed corrective actions that balanced efficiency and cost-effectiveness.

❖ Collaborated with private companies responsible for production and sales as well as budgetary ones such as state schools, municipal and city offices to improve and implement new IT solutions that improved the end-user experience thanks to the implemented improvements.

❖ Assisted in gathering requirements through interviews to effectively identify customer business needs before the start date of the IT project.

PROJECTS

resume.emteq.pl – Dynamic Resume Website | Independent Project | 2023

- Developed website using HTML, CSS and JavaScript to create a dynamic website which displays article read counter and contact form by using API and AWS resources. Deployed the website on **Amazon S3 Bucket and enabled Amazon CloudFront** for quick site-loading all over the world using serverless architecture. **Implemented API gateway, Lambda Functions and DynamoDB** for backend processes.
  Scripted the entire architecture as Infrastructure as Code for easy deployments.

przedluzaniewlosow.net – Startup/Portfolio Website | Independent Project | 2022

- Applied skills in HTML, CSS, Bootstrap, Jquery and JavaScript to create a static website. Deployed a static website on **AWS S3 bucket and used CloudFront** for content delivery. Implemented an automated update process using GitHub Actions to ensure seamless and efficient website maintenance.

emteq.pl Website/Blog | Independent Project | 2020

- A Magento-based website with the ability to sell online and a blog for updating content and conveying information to viewers. Installed on an **AWS** VPS server.
